- PROBLEM

02

Independent pharmacies build the staff rota by hand, every week, around state pharmacist-on-duty rules.

- 01 One missed pharmacist shift means the pharmacy cannot legally open.
- 02 Owners juggle part-time techs, students and locum pharmacists in group chats.

- SOLUTION

03

Tidewell builds a compliant rota in one click and fills gaps from your own bench.

Set opening hours and who can work. Tidewell checks every shift against your state's on-duty rules and texts available staff when someone drops out.

- PRODUCT

04

What Tidewell does.

-
- | | | |
|----|----------------|--|
| 01 | Compliant rota | Every shift checked against your state's pharmacist-on-duty rules. |
| 02 | Gap fill | Open shifts go to qualified staff by text, first yes wins. |
| 03 | Payroll export | Approved hours export to Gusto or ADP. |
-

- BUSINESS MODEL

05

A flat monthly fee per pharmacy location.

- 01 No per-user pricing — add every tech and locum
- 02 Cancel any month

• TEAM

06

The people building Tidewell.

Grace Okafor

Co-founder

Pharmacist and owner of two independent pharmacies in Ohio.

Tom Lindqvist

Co-founder, engineering

Previously built scheduling tools for hospital nursing teams.
