

Shift scheduling for independent pharmacies

tidewell.co · grace@tidewell.co

— PROBLEM

Independent pharmacies build the staff rota by hand, every week, around state pharmacist-on-duty rules.

01

One missed pharmacist shift means the pharmacy cannot legally open.

02

Owners juggle part-time techs, students and locum pharmacists in group chats.

— SOLUTION

Tidewell builds a compliant rota in one click and fills gaps from your own bench.

HOW IT WORKS

Set opening hours and who can work. Tidewell checks every shift against your state's on-duty rules and texts available staff when someone drops out.

— PRODUCT

What Tidewell does.

01

Compliant rota

Every shift checked against your state's pharmacist-on-duty rules.

02

Gap fill

Open shifts go to qualified staff by text, first yes wins.

03

Payroll export

Approved hours export to Gusto or ADP.

— BUSINESS MODEL

A flat monthly fee per pharmacy location.

01

No per-user pricing — add every tech and locum

02

Cancel any month

— TEAM

The people building Tidewell.

Grace Okafor

Co-founder

Pharmacist and owner of two independent pharmacies in Ohio.

Tom Lindqvist

Co-founder, engineering

Previously built scheduling tools for hospital nursing teams.

— THE ASK

We're looking for people to build this with.
